

Curriculum Vitae
Iulia Martina Bulai
Associate Professor
Updated: 16 June 2026

Personal Information

Surname/First name Bulai Iulia Martina
E-mail iuliamartina.bulai@unito.it
PEC martina.bulai@pec.it
Nationality Italian/Romanian
Date of birth 27 June 1988
ORCID 0000-0002-9570-8532
Webpage <https://iuliamartinabulai.github.io>

Education

Feb 2017 **Ph.D. in Mathematics**, *University of Torino*.
Supervisor: Prof. Ezio Venturino.
2013 **Master of Science in Mathematics**, *University of Torino*.
Supervisor: Prof. Elena Cordero.
2011 **Bachelor's Degree in Mathematics**, *University of Torino*.
Supervisors: Prof. Catterina Dagnino and Prof. Paola Lamberti.

Current position and previous positions

Mar 2025–present **Associate Professor in Numerical Analysis, MATH/05**, *Department of Mathematics "Giuseppe Peano", University of Torino*.
Jan 2025–Feb 2025 **Associate Professor in Numerical Analysis, MATH/05**, *Department of Chemical, Physical, Mathematical and Natural Sciences, University of Sassari*.
Jan 2022–Dec 2024 **Tenure-track Assistant Professor**, *Department of Chemical, Physical, Mathematical and Natural Sciences, University of Sassari*.
2024 Ricercatrice a tempo determinato di tipo B; SSD: MAT/05, 1 Jan 2022–22 Oct 2023; MAT/08, 23 Oct 2023–Dec 2024.
Aug 2019–Dec 2021 **Assistant Professor in Numerical Analysis**, *Department of Mathematics, Informatics and Economics, University of Basilicata*.
2021 Ricercatrice a tempo determinato di tipo A; SSD: MAT/08.
Mar 2019–Jul 2019 **Postdoctoral Research Fellow**, *Department of Information Engineering, University of Padova*, Department of Excellence 2018–2022..
Project title: "Next-generation modelling of wave and network properties in pancreatic islets".
Supervisor: Prof. Morten Gram Pedersen.

Mar **Postdoctoral Research Fellow**, *Department of Information Engineering, University of*
2017–Mar *Padova, Department of Excellence* 2018–2022..
2019 Project title: “Spatiotemporal and Stochastic Simulation Studies of Calcium Channels Effects in Endocrine Cells”. Supervisor: Prof. Morten Gram Pedersen.

Qualifications

Jan 2023–Jan 2034 National Scientific Qualification for Associate Professor in Numerical Analysis, MAT/08 (Abilitazione Scientifica Nazionale per Professore di II fascia in MAT/08).

Research areas of interest

- Numerical computation of automorphic forms.
- Graph signal processing; computational time-frequency analysis and applications.
- Numerical methods; software development; approximation theory.
- Optimal control.
- Mathematical modelling with applications to real-life problems, including cancer, COVID-19, electrical activity and Ca^{2+} dynamics in endocrine cells, epidemiology, ecology, eco-epidemiology, and wastewater bioremediation.
- Slow–fast bifurcation analysis; excitation waves; geometric singular perturbation theory (GSPT); bifurcation diagrams.

Fellowships

Jun 2025 Two funded fellowships: “ICTP-INdAM Collaborative Grants and Research in Pairs 2024–2025”, Abdus Salam International Centre for Theoretical Physics, Trieste, Italy, 8–22 June 2025.

Research funding

Apr 2026 INdAM–GNCS research grant, PI: INdAM–GNCS Project 2026, 2026–2027, EUR 1,400. Title: “Metodi numerici per modelli integrali e dinamiche con memoria”.

Feb 2025 INdAM–GNCS research grant, member: INdAM–GNCS Project 2025, 2025–2026, EUR 3,200. Title: “Metodi di approssimazione globale per operatori integrali e applicazioni alle equazioni funzionali”.

Jun 2024 University research grant, University of Sassari, member: DM 737/2021, internal call for collaborative research between the University of Sassari and the University of Cagliari, 2024, EUR 19,673.23. Title: “Studio di modelli nelle scienze della vita”.

Jan 2024 MGR 2023 research grant, PI: Mobilità Giovani Ricercatori 2024, EUR 12,300. Title: “Mathematical modelling and control theory”.

Jun 2023 PRIN 2022 Under 40 research grant, PI: Progetti di Rilevante Interesse Nazionale 2023–2025, EUR 187,500. Title: “Time-varying signals on Graphs: REal and COMplex methods – TIGRECO”.

Apr 2023 University research grant, University of Sassari, member: Interdisciplinary research projects, 2023–2025, EUR 34,762.18. Title: “RIACT – RIpristino degli Ambienti Costieri con approcci Transdisciplinari”.

Feb 2023 INdAM–GNCS research grant, member: INdAM–GNCS Project 2023, 2023–2024, EUR 6,600. Title: “Approssimazione ed integrazione multivariata con applicazioni ad equazioni integrali”.

- Jan 2023 Fondazione Sardegna research grant, member: Progetti di ricerca di base dipartimentali, 2023–2024, EUR 73,300. Title: “Sviluppo di un sistema di monitoring ambientale e di early warning per i cambiamenti climatici e possibili effetti sulla dinamica delle popolazioni”.
- Dec 2021 INdAM–GNCS research grant, PI: Finanziamento GNCS Giovani Ricercatori 2021–2022, EUR 1,500. Title: “Wavelet packets approximation on graphs”.
- Oct 2020 INdAM–GNCS research grant, PI: Finanziamento GNCS Giovani Ricercatori 2020–2021, EUR 1,500. Title: “Modelling COVID-19 considering asymptomatic cases and avoided contacts”.
- 2020 RIL research grant, PI: Ricerca di Interesse Locale 2020–2021, EUR 958.87. Title: “Modelli matematici per il Covid-19”.
- 2020 INdAM–GNCS research grant, member: INdAM–GNCS Project 2020, 2020–2021, EUR 6,400. Title: “Approssimazione multivariata ed equazioni funzionali per la modellistica numerica”.
- Jul 2019–Dec 2021 Research grant: RTdA Attraction and International Mobility, AIM1852570, Num. Attività 1, Linea 1, Potenza, Italy.
- Mar–Jul 2019 Research grant: Assegno di ricerca di tipo A, Padova, Italy. Title: “Next-generation modelling of wave and network properties in pancreatic islets”.
- Oct 2018 INdAM–GNCS research grant, PI: Finanziamento GNCS Giovani Ricercatori 2018–2019, EUR 1,200. Title: “Fermare le onde: un’analisi geometrica del modello discreto PDE di beta-cellule accoppiate”.
- Mar 2017–Mar 2019 Research grant: Assegno di ricerca di tipo A, Padova, Italy. Title: “Spatiotemporal and Stochastic Simulation Studies of Calcium Channels Effects in Endocrine Cells”.
- Oct 2016 INdAM–GNCS research grant, PI: Finanziamento GNCS Giovani Ricercatori 2016–2017, EUR 1,200. Title: “Efficienza dell’immobilizzazione dei funghi su supporti di forme geometriche diverse, un modello matematico”.

Publications

Indicators related to scientific production, updated on 16 June 2026:

Total number of citations: 377 (Scopus), 518 (Google Scholar). H-index: 9 (Scopus), 12 (Google Scholar).
Publications: 39 (Scopus), 63 (Google Scholar).

Invited presentations to national and international conferences

- Feb 2026 **Invited contributed talk:** “Modeling the control on the formation and dissolution of amyloid plaques in Alzheimer’s disease”, 16th Conference on Dynamical Systems Applied to Biology and Natural Sciences (DSABNS 2026), Granada, Spain.

- Nov 2025 **Invited talk:** "Optimal control of monomers and oligomers degradation in an Alzheimer's disease model", Two Days on Mathematical Modeling of Disease Evolution, Sardinia, Italy.
- Oct 2025 **Invited talk:** "Wavelet packets and graph signal processing", Multiresolution Methods for Unstructured Data: Past, Present and Future, Lugano, Switzerland.
- Oct 2025 **Invited talk:** "Control Metastatic Tumor Growth: from Modeling to Numerical Results", Approximation, Quadrature, and Applications (AQuA25), Sardinia, Italy.
- Jul 2025 **Invited contributed talk:** "Optimal Control of Virotherapy in a Tumor Model", SIAM Conference on Control and Its Applications (CT25), Montreal, Canada.
- AUG 2024 **Invited talk:** "Wavelet packets and graph signal processing" at Santaló school Data Science, Signal Processing and Harmonic Analysis, Buenos Aires-AR.
- JUL 2024 **Invited contributed talk:** "Stopping waves: geometric analysis of coupled bursters" at 2nd International American Mathematical Society (AMS) and Unione Matematica Italiana (UMI) Joint Meeting, Palermo-IT.
- MAY 2024 **Invited talk:** "Modeling fast information and slow(er) disease spreading: a geometric analysis" at the University of Tennessee, Mathematics Department, Tennessee-USA.
- APR 2024 **Invited talk:** "Wavelet packets and graph signal processing" at Workshop TIGRECO 2024 "Time-varying signals on Graphs: REal and COMplex methods", Bergamo-IT.
- FEB 2024 **Invited talk:** "Building Professional Networks/Finding Research Collaborators" at Global Woman Breakfast Uniss (GWB 2024), Sassari-IT.
- FEB 2024 **Invited contributed talk:** "Modeling fast information and slow(er) disease spreading: a geometric analysis" at 15th Conference on Dynamical Systems Applied to Biology and Natural Sciences (DSABNS 2024), Lisbona-PT.
- DEC 2023 **Invited contributed talk:** "Polynomial Approximation for Spectral Graph Wavelet Packet Kernels" at Scientific toolkit for kernel-based approximation and its applications (SToK 2023), Camerino-IT.
- SEP 2023 **Invited contributed talk:** "Wavelet packets and graph neuronal signal processing" at International Conference of Numerical Analysis and Applied Mathematics (ICNAAM), Crete-EL.
- SEP 2023 **Invited contributed talk:** "Modeling metastatic tumor evolution, numerical resolution and growth prediction" at International Association for Mathematics and Computers in Simulations (IMACS), Roma-IT.
- AUG 2023 **Two invited contributed talks:** "Bistability of a mathematical model for the control of an olive tree disease" and "Wavelet packets and graph neuronal signal processing" at Italian Society of Applied and Industrial Mathematics (SIMAI), Matera-IT.
- JUL 2023 **Invited contributed talk:** "Control Metastatic Tumor Growth: from Modeling to Numerical Results" at SIAM Conference on Control and Its Applications (CT23), Philadelphia, Pennsylvania-USA.
- JUL 2023 **Invited contributed talk:** "Bistability of a mathematical model for the control of an olive tree disease" at the Workshop At the interface of Agriculture, Artificial Intelligence, Mathematics and Earth Observation applications (MathAIEOapp), Bari-IT.
- JUN 2023 **Invited contributed talk:** "Graph signal processing and wavelet packets" at Challenges and Advances in Numerical Analysis (CaNA), Cagliari-IT.
- JUL 2022 **Invited contributed talk:** "Modeling metastatic tumor growth, numerical resolution and prediction" at Functional Analysis, Approximation Theory and Numerical Analysis, Matera-IT.
- JUN 2022 **Invited talk:** "Mathematical models and network approach to better understand Covid-19" at Convegno e Assemblea GNCS 2022, Montecatini Terme-IT.

- JUN 2022 **Invited contributed talk:** "Covid-19 from a network perspective" at Models in Population Dynamics, Ecology and Evolution, MPDEE, Torino–IT.
- SEP 2021 **Invited contributed talk:** "Modeling metastatic tumor growth, numerical resolution and prediction" at 5th Dolomites Workshop on Constructive Approximation and Applications, 2021, Virtual.
- JUL 2021 **Invited contributed talk:** "Modeling Covid-19 considering asymptomatic cases and avoided contacts" at ECCOMAS Young Investigators 2021, Virtual.
- OCT 2020 **Invited contributed talk:** "Geometric analysis of a phantom bursting model" at Virtual Advances in Differential Equations and Numerical Analysis, ADENA.
- MAY 2020 **Invited talk:** "Validation of a dynamical system with real data applied to wastewater treatment" at Seminari Padovani di Analisi Numerica, SPAN2020, Padova–IT. **Postponed.**
- FEB 2020 **Invited talk:** "Geometrical analysis of mixed-mode bursting oscillations in a multiple-timescale model" at Convegno e Assemblea GNCS 2020, Montecatini Terme–IT.
- MAY 2018 **Invited talk:** "Stopping waves: geometric analysis of coupled bursters" and chair at Seminari Padovani di Analisi Numerica, SPAN2018, Padova–IT.
- FEB 2018 **Invited talk:** "Competing for resources in the presence of infection: Mathematical models of foraging interference and disease transmission" at Convegno e Assemblea GNCS 2018, Montecatini Terme–IT.
- DEC 2018 **Invited contributed talk:** "Interactions among phytopathogens and phyllosphere microorganisms" at International Workshop Modeling tools - Survey Meeting of the COST Action FA1405, Torino–IT.
- JUN 2017 **Invited talk:** "The role of fungi in biological systems, a mathematical approach" at Cerimonia di consegna diplomi, Dottorato in Matematica XXIX ciclo, (Graduation Ceremony, Doctorate in Mathematics XXIX cycle), Torino – IT.
- MAY 2017 **Invited contributed talk:** "A mathematical model for an olive tree" at 2nd International Workshop Franco-Italian Mathematical Ecology Days, Torino – IT.

International conference contributions and schools

- Sep 2025 **Participant**, Società Italiana di Matematica Applicata e Industriale, SIMAI 2025, Trieste, Italy.
- Jul 2025 **Contributed talk:** "Modeling fast information and slow(er) disease spreading", Society for Mathematical Biology (SMB 2025), Edmonton, Canada.
- Feb 2025 **Participant**, Workshop Software for Approximation, SA2025, Torino, Italy.
- GEN 2024 **Participant:** at 16th Conference on Dynamical Systems Applied to Biology and Natural Sciences (DSABNS 2024), Napoli-IT.
- JUN-JUL 2024 **Contributed talk:** "Control Metastatic Tumor Growth: from Modeling to Numerical Results" at Joint annual meeting of the Korean Society for Mathematical Biology and the Society for Mathematical Biology (KSMB-SMB) Seoul–KOR.
- JUN 2024 **Participant** at SIAM Conference on Life Sciences (LS24) Held Jointly with Mathematics of Planet Earth (MPE24) Portland–USA.
- MAY-JUN 2024 **Contributed talk:** "Control Metastatic Tumor Growth: from Modeling to Numerical Results" at International Conference on Differential Equations: Theory and Applications (ICDE), Forth Myers–USA.
- MAY 2024 **Contributed talk:** "Modeling fast information and slow(er) disease spreading: a geometric analysis" at Biology and Medicine Trough Mathematics Conference (BAMM), Richmond–USA.

FEB 2024 **Participant** at Convegno e Assemblée GNCS 2024, Rimini-IT.

JUL 2023 **Contributed talk:** "Wavelet packets and graph neuronal signal processing" at the Annual Meeting of the Society for Mathematical Biology (SMB), Columbus-USA.

JUN 2023 **Poster:** "Stopping waves: geometric analysis of coupled bursters" at Dynamical Systems in the Life Sciences Conference (DSLS23), Columbus-USA.

JUN 2023 **Contributed talk:** "Modeling metastatic tumor growth, numerical resolution and prediction" at the International Conference on Approximation Theory and Application, UMI-TAA. Cetraro-IT.

MAY 2023 **Contributed talk:** "Bistability of a mathematical model for the control of an olive tree disease" at the Workshop Modellistica Socio-Epidemiologica, MSE. Napoli-IT.

FEB 2023 **Participant** at Workshop Software for Approximation, SA2023, Torino-IT.

JAN 2023 **Participant** at Approximation: Theory, Methods and Applications, ATMA2023, Padova-IT.

SEP 2022 **Contributed talk:** "Modeling metastatic tumor growth, numerical resolution and prediction" at GIMC SIMAI YOUNG 2022 Workshop, Pavia-IT.

MAR 2022 **Poster:** "Modeling Metastatic Tumor Growth, Numerical Resolution and Prediction" at SIAM Conference on Analysis of Partial Differential Equations (PD22), On-line.

FEB 2022 **Participant** at Workshop Software for Approximation, SA2022, On-line.

JAN 2022 **Participant** at Winter Workshop on Complex System, On-line.

NOV-DEC 2021 **Contributed talk:** "Graph signal processing and wavelet packets" at the 10th International Conference on Complex Networks and their Applications. On-line.

NOV 2021 **Contributed talk:** "Graph signal processing and wavelet packets" at Approximation: Theory, Methods and applications, ATMA2021, Reggio Calabria-IT.

SEP 2021 **Contributed talk:** "Graph signal processing and wavelet packets" at International Conference on Computational Harmonic Analysis, ICCHA2021, On-line.

AUG 2021 **Contributed talk:** "Stopping waves: geometric analysis of coupled bursters" at 13th International Society for Analysis its Applications and Computations (ISAAC) Congress 2021, On-line.

FEB 2021 **Contributed talk:** "A dynamical system and network approach to better understand Covid-19" at SMB Mathematical Epidemiology and Math Education Joint Workshop 2021, On-line.

FEB 2021 **Participant** at Workshop Dynamical Systems Applied to Biology and Natural Sciences, DSABNS 2021, On-line.

FEB 2021 **Participant** at Winter Workshop on Complex System, On-line.

DEC 2020 **Poster:** "Geometric analysis of a phantom bursting model" at Virtual Annual Conference on Complex Systems (ECCS or CCS).

NOV 2020 **Contributed talk:** "Modeling Covid-19 considering asymptomatic cases and avoid contacts" at Virtual 20th International Symposium on Mathematical and Computational Biology, BIOMAT.

AUG 2020 **Poster:** "Modeling Covid-19 considering asymptomatic cases and avoid contacts" at Virtual Annual Meeting of the Society for Mathematical Biology, SMB2020.

JAN 2020 **Participant** at Winter Workshop on Complex System, Charmey-CH.

JUL 2019 **Contributed talk:** "Geometrical analysis of mixed-mode bursting oscillations in a multiple-timescale model of bursting electrical activity" at Annual Meeting of the Society for Mathematical Biology, Montreal-CAN.

- MAY 2019 **Poster:** "Bursting versus spiking: Systematic investigation of how patterns of electrical activity control local Ca^{2+} and hormone release" at Quantitative Aspects of Membrane Fusion and Fission, BPS Thematic Meeting, Padova-IT.
- FEB 2019 **Poster:** "Stopping waves: Geometric analysis of coupled bursters in an asymmetric excitation field" at Winter Workshop on Complex Systems, Zakopane-PL.
- OCT 2018 **Poster:** "Bursting versus spiking: Systematic investigation of how patterns of electrical activity control local Ca^{2+} and hormone release" at Nanoscale mathematical modeling of synaptic transmission, calcium dynamics, transduction and cell sensing, Pisa-IT.
- JUL 2018 **Contributed talk:** "Stopping waves: geometric analysis of coupled bursters in an asymmetric excitation field" and chair at Annual Meeting of the Society for Mathematical Biology and the Japanese Society for Mathematical Biology, Sydney-AU.
- JUN 2018 **Participant** at Joint CAMBAM/NSERC-CREATE in Complex Dynamics Summer School, McGill University, Montreal-CAN.
- FEB 2018 **Contributed talk:** "A new mathematical model for pancreatic β cells: geometric analysis of coupled bursters" at Ninth Workshop Dynamical Systems Applied to Biology and Natural Sciences, DSABNS 2018, Torino – IT.
- JAN-FEB 2017 **Contributed talk:** "A mathematical model for an olive tree" at Eight Workshop Dynamical Systems Applied to Biology and Natural Sciences, DSABNS 2017, Évora – PT.
- NOV 2016 **Contributed talk:** "Shape effects on herd behavior in ecological interacting population models" at 1st International Workshop Franco-Italian Mathematical Ecology Days, Torino – IT.
- OCT 2016 **Contributed talk:** "Fungi and wastewater bioremediation: mathematical models" at Seminari dei dottorandi, (Doctoral Student Seminars), Turin – IT.
- JUL 2016 **Contributed talk:** "Competition between algae and fungi in a lake: a mathematical model" at 16th International Conference Computational and Mathematical Methods in Science and Engineering, CMMSE2016, Rota – ES.
- JUN 2016 **Contributed talk:** "Waste-water bioremediation using white rot fungi: validation of a dynamical system" at International Conference on Mathematical Methods and Models in Biosciences and the School for Young Scientists, BIOMATH2016, Blagoevgrad-BU.
- JAN 2016 **Participant** at School on Physics Applications in Biology, (ICTP South American Institute for Fundamental Research), San Paolo-BR.
- JAN 2016 **Participant** at V Southern-Summer School on Mathematical Biology, (ICTP South American Institute for Fundamental Research), San Paolo-BR.
- DEC 2015 **Poster** at **Welcome home**, Turin – IT.
- SEP 2015 **Contributed talk:** "The Beddington-De Angelis and the HTII product response functions: application to polluted ecosystems biodegradation" at 13th International Conference Of Numerical Analysis And Applied Mathematics, ICNAAM2015, Rhodes – GR.
- SEP 2015 **Participant** at CAMo: from molecules to modelling, Turin – IT.
- JUL 2015 **Contributed talk:** "A mathematical model for the biodegradation of organic pollutants in a lake" at 15th International Conference Computational and Mathematical Methods in Science and Engineering, CMMSE2015, Rota – ES.
- NOV 2014 **Contributed talk:** "Shape effects on herd behavior in ecological interacting population models" at Seminari dei dottorandi, (Doctoral Student Seminars), Turin – IT.
- OCT 2014 **Participant** at Computational Harmonic Analysis - with Applications to Signal and Image Processing School, (CIRM), Marsiglia – FR.
- JUN 2014 **Participant** at Strobl14: Modern time-frequency analysis, Strobl – AT.

Teaching activities

Postdoctoral supervision

- 1 Jan–31 Dec 2025 Scientific advisor of the postdoctoral project “Analytical and numerical methods for graph signal processing”, PRIN 2022 project “Time-varying signals on Graphs: REal and COMplex methods” – TIGRECO. Isidoros Iakovidis, University of Sassari.

Scholarship supervision

- 15 Apr–14 Oct 2024 Scientific advisor of the postgraduate scholarship “Mathematical modeling and analysis of biological systems”, projects FAR2020MONTEFUSCOF and FAR2020STEGERT. Giulia Orrù, University of Sassari.
- 1 Aug 2023–31 Mar 2024 Scientific advisor of the postgraduate scholarship “Study of mathematical models for population dynamics and biodiversity distribution”, project FDS2223Bagella. Giulia Orrù, University of Sassari.
- 1 May–30 Sep 2022 Scientific advisor of the postgraduate scholarship “Studio di modelli epidemiologici caratterizzati da classi non omogenee con applicazione a Covid-19”, project FAR2019BELLAZZINI. Martina Salvia, University of Sassari.

Master’s thesis supervision

- Ongoing Anna Barile, University of Torino.

Bachelor’s thesis supervision

- Ongoing Vittoria Peirolo, Eleonora Negro, Laura Panero, Alice Manavella, University of Torino.
- 2025 Alessandro Esposito, thesis title: “Biological optimal control of Citrus black spot disease”, University of Torino.
- 2022 Martina Salvia, thesis title: “An epidemiological mathematical model assuming non-well-mixed population, an application to COVID-19”, University of Basilicata.
- 2022 Stefania Allegretti, thesis title: “Modeling oncolytic virotherapy”, University of Basilicata.

Degree committees

- 2025/2026 Member of the degree committee in Mathematics, University of Torino.
- 2020/2021 Member of the degree committee in Mathematics, University of Basilicata.
- 2019/2020 Member of the degree committee in Mathematics, University of Basilicata.

Teaching

- 2025/2026 Course lecturer for the Bachelor’s Degree Programme in Mathematics for Economics: **Numerical Analysis** (Analisi Numerica), 3.5 CFU, 28h, University of Torino.
- 2025/2026 Course lecturer for the Bachelor’s Degree Programme in Mathematics: **Advanced Numerical Analysis** (Analisi Numerica Avanzata), 4 CFU, 32h, University of Torino.
- 2025/2026 Course lecturer for the Master’s Degree Programme in Informatics: **Numerical Methods** (Metodi Numerici), 2 CFU, 16h, University of Torino.
- 2025/2026 Course lecturer for the Master’s Degree Programme in Mathematics: **Biomathematics** (Biomatematica), 6 CFU, 48h, University of Torino.
- 2024/2025 Course lecturer for the Bachelor’s Degree Programme in Mathematics: **Numerical Analysis II** (Analisi Numerica II), 2 CFU, 16h, University of Torino.
- 2024/2025 Course lecturer for the Bachelor’s Degree Programme in Mathematics: **Advanced Numerical Analysis** (Analisi Numerica Avanzata), 3 CFU, 24h, University of Torino.
- 2024/2025 Course lecturer for teacher training courses, class A28: **Didattica della matematica: la costruzione del ragionamento matematico e fondamenti matematici**, 3 CFU, 18h, University of Sassari.

2024/2025 Course lecturer for the Bachelor's Degree Programme in Chemistry and Pharmaceutical Technology: **Mathematics** (Matematica con elementi di statistica), 6 CFU, 57h, University of Sassari.

2023/2024 Lecturer for a module in the **Introduction to Scientific Research Course for PhD Students** (Corso di Avviamento alla ricerca scientifica per PhD), University of Sassari.

Teaching training

2023 Faculty development course. Teaching training project for University of Sassari researchers, 4 modules of 6h each.

Self-governance

Committees in selection procedures

2026 President of the PhD final examination committee for the thesis defense of Igor Daniel Weber, PhD Program in Ingegneria Civile, Ambientale, della Cooperazione Internazionale e di Matematica, XXXVIII cycle, University of Brescia, 20 March 2026.

2025 Member of the committee for the Landahl Travel Grant Award, Society for Mathematical Biology annual meeting.

2025 Member of the committee for admission to the PhD Program in Mathematics, XLI cycle, University of Torino. Bando D.R. n. 5909/2025, Prot. n. 0404481, 19 June 2024.

2024 President of the committee for the final examination for admission to the teacher training programme, class A28, University of Sassari, 17 December 2024.

Institutional roles

2026–present Member of the Executive Committee (Giunta) of the Bachelor's Degree Programme in Mathematics, class L-35, University of Torino.

2026–present Member of the Monitoring and Review Committee (Commissione Monitoraggio e Riesame, CMR) of the Degree Programme in Mathematics, University of Torino.

2025–present Member of the Outgoing Orientation Subcommittee, Orientation, Tutoring and Placement Committee, University of Torino.

2024–2025 Member of the Departmental Committee for Third Mission (Terza Missione), University of Sassari.

2023–2025 Member of the teaching staff for the teacher training programme, class A28 (Percorsi di formazione insegnanti, classe A28), University of Sassari.

Scientific and Professional Service

Editorial boards and journal management

2026–present **Editorial Board Member**, Journal of Mathematical Modeling of Biological Systems (MMSB).

2025–present **Editorial Board Member**, Journal of Mathematical Biology (JOMB).

2024–present **Editorial Board Member**, Bulletin of Biomathematics (BBM).

2024–present **Journal Manager**, Journal of Approximation Software.

2022–present **Editorial Board Member**, Mathematical Modelling and Numerical Simulation with Applications (MMNSA).

2022–present **Editorial Board Member**, Frontiers in Complex Systems, section Multi- and Cross-disciplinary Complexity.

Review editor roles

2023–present **Review Editor**, PLOS Complex Systems.

Guest editor roles

2026–2027 **Guest Editor**, Special Issue “Mathematical Modelling in the Life Sciences: Honouring the Scientific Legacy of Prof. Ezio Venturino”.

2024–2025 **Guest Editor**, Special Issue “NAMAS – Numerical Analysis & Modelling in Applied Sciences”, Journal of Approximation Software.

2024–2025 **Guest Editor**, Special Issue “NAMAS – Numerical Analysis & Modelling in Applied Sciences”, Journal of Computational and Applied Mathematics.

2024–2025 **Guest Editor**, Topical Collection “Numerical Analysis & Modelling in the Life Sciences: in honor of the 70th birthday of Ezio Venturino”, Journal of Mathematical Biology.

Referee activity

Referee Nonlinear Dynamics; Advances in Difference Equations; BioSystems; Mathematics and Computers in Simulation; Biometrical Journal; Applied Mathematics and Computation; Fractal and Fractional; IFAC-PapersOnLine; Mathematics; International Journal of Environmental Research and Public Health; Chaos, Solitons and Fractals; Applied Numerical Mathematics; Letters in Biomathematics; International Journal of Modeling, Simulation, and Scientific Computing; Annali dell'Università di Ferrara; Symmetry; Mathematical Modelling and Numerical Simulation with Applications; Journal of Biological Systems; PLOS ONE; Dolomites Research Notes on Approximation; PLOS Complex Systems; IEEE Control Systems Letters.

Assignments in research societies

2025–present **Elected Council Member**, Neuroscience Subgroup of the Society for Mathematical Biology.

2020–2023; **Elected Council Member**, Complex Systems Society, two three-year mandates.
2023–2026

2020–2023; **Elected Member of the Steering Committee**, Conference on Complex Systems (CCS),
2023–2026 two three-year mandates.

Other assignments

2021, 2022 **Program Committee**, International Conference on Complex Networks and their Applications.

2025, 2026 **Program Committee**, International School and Conference on Network Science.

2022–present **Program Committee**, Conference on Complex Systems.

Mar **Scientific evaluator**, Register of Expert Peer Reviewers for Italian Scientific Evaluation
2022–present (RePRISE), 1 project evaluated.

2024 **Program Committee**, NetSci-X.

Jul **Scientific evaluator**, International expert panels of the Slovak Research and Development
2024–present Agency (SRDA).

2024 **Scientific Committee**, conference “NAMAS – Numerical Analysis & Modelling in Applied Sciences”, 16–20 September 2024, Gaeta, Italy.

2025 **Scientific Committee**, International Conference on Mathematics and Applied Data Science (ICMADS'25), 29–31 August 2025, Necmettin Erbakan University, Konya, Türkiye.

PhD thesis 3 theses.
referee

Memberships of scientific societies and groups

- 2026–present Member of Mathematical and Computational Life Sciences SIMAI Subgroup (MCLS).
- 2026–present Member of Math & Brain SIMAI Subgroup (M&B).
- 2024–present Member of Artificial Intelligence and Machine Learning UMI Subgroup (AI-ML).
- 2023–present Member of the Society for Industrial and Applied Mathematics (SIAM). Activity groups: Control and Systems Theory, Life Sciences, Mathematics of Planet Earth.
- 2022–present Member of Approssimazione Numerica ed Analitica di dati e di Funzioni con Applicazioni SIMAI Subgroup (ANA&A).
- 2021–present Member of Modellistica Socio-Epidemiologica UMI Subgroup (MSE).
- 2020–present Member of Mathematical Epidemiology SMB Subgroup.
- 2020–present Member of Mathematical Neuroscience SMB Subgroup.
- 2020–present Member of Mathematical Oncology SMB Subgroup.
- 2020–present Member of Teoria dell'Approssimazione e Applicazioni UMI Subgroup (T.A.A.).
- 2020–present Member of Unione Matematica Italiana (UMI).
- 2020–present Member of Società Italiana di Matematica Applicata e Industriale (SIMAI).
- 2019–present Member of Research Italian network on Approximation (RITA).
- 2019–present Member of European Women in Mathematics (EWM).
- 2019–present Member of Complex Systems Society (CCS).
- 2019 Member of Biophysical Society (BPS).
- 2016–present Member of Society for Mathematical Biology (SMB).
- 2016–present Member of Gruppo Nazionale per il Calcolo Scientifico, GNCS-INdAM.
- 2013–2015 Member of Gruppo Nazionale per l'Analisi Matematica, la Probabilità e le loro Applicazioni, GNAMPA-INdAM.

Mobility

- 2025–2026 Several visits, totaling one month, Department of Chemical, Physical, Mathematical and Natural Sciences, University of Sassari, hosted by Prof. Tim Steger, Sassari, Italy.
- 10–16 Nov 2025 Department of Mathematics, University of Torino, and Department of Information Engineering, University of Padova, Italy.
- 4 May–16 Jun 2024 Department of Mathematics, University of Tennessee, hosted by Prof. Suzanne Lenhart, Knoxville, USA.
- 20–25 Sep 2021 Department of Mathematics and Computer Science, University of Cagliari, hosted by Prof. Luisa Fermo, Cagliari, Italy.
- 1 Oct 2020–31 Mar 2021 Medical Image Processing Lab, jointly between École Polytechnique Fédérale de Lausanne (EPFL) and the University of Geneva. October in person and November–March remotely. Hosted by Prof. Dimitri Van De Ville, Geneva, Switzerland.
- 22–28 Jan 2017 Institute of Environmental Systems Research, University of Osnabrück, hosted by Prof. Frank Hilker, Osnabrück, Germany.
- 1 Aug–30 Sep 2016 Institute of Environmental Systems Research, University of Osnabrück, hosted by Prof. Frank Hilker, Osnabrück, Germany.
- 1 Sep–31 Mar 2015 Istituto Superiore Mario Boella (ISMB), Laboratory for Antennas and Electromagnetic Compatibility (LACE), Torino, Italy.
- 1 Feb–31 Mar 2014 Numerical Harmonic Analysis Group (NuHAG), University of Vienna, hosted by Prof. Hans Georg Feichtinger, Vienna, Austria.

Invited guests

- Sep 2025 Prof. Sandra Saliani, Parthenope University, Italy.
Mar 2024 Prof. Luisa Fermo, University of Cagliari, Italy.
Apr 2024 Prof. Ezio Venturino, University of Torino, Italy.
Apr 2024 Dr. Francesca Acotto, University of Torino, Italy.

Major collaborations

- Biomat** F. Acotto and E. Venturino (mathematical modelling, University of Torino, Italy); M. G. Pedersen (mathematical modelling of cellular processes, University of Padova, Italy); S. Bagella, F. Ferraresso, F. Gladiali, G. Orrù and M. Malvasi (modelling and applications, University of Sassari, Italy); M. Salvia and S. Allegretti (modelling and approximation, University of Basilicata, Italy).
- Control** S. Lenhart (optimal control theory, University of Tennessee, USA); F. Montefusco (control systems engineering, Parthenope University of Naples, Italy).
- Dynamics** M. Sensi (fast-slow analysis, Politecnico di Torino, Italy); S. Sottile (fast-slow analysis, University of Bologna, Italy).
- Ecology** P. Baptista and T. Gomes (biology, Polytechnic Institute of Bragança, Portugal); H. Laurie (mathematical ecology, University of Cape Town, South Africa); P. K. Tiwari (mathematical modelling, University of Kalyani, India); A. K. Misra (mathematical modelling, Banaras Hindu University, India); F. Spina and G. C. Varese (environmental biotechnology, University of Torino, Italy); F. Hilker (modelling environmental and ecological systems, Osnabrück University, Germany); A. S. Teixeira (complex systems, University of Lisbon, Portugal).
- Geometry** T. Steger (automorphic forms, fake projective planes, University of Sassari, Italy).
- Graphs** S. Saliani (graph signal processing and harmonic analysis, Parthenope University, Italy); E. Amico (network neuroscience, EPFL, Switzerland).
- Numerics** M. C. De Bonis, C. Laurita and V. Sagaria (numerical analysis, University of Basilicata, Italy); L. Fermo (approximation theory, University of Cagliari, Italy).

Organization of scientific meetings

Conferences

- Sep 2024 **Organizer**, conference “Modelli nelle scienze della vita”, Cagliari, Italy. https://web.unica.it/unica/page/it/antonio_greco_avs_modelli_nelle_scienze_della_vita
- Sep 2024 **Organizer**, conference “Numerical Analysis & Modelling in Applied Sciences” (NAMAS 2024), Gaeta, Italy. <https://sites.google.com/view/namas-24/home>
- Oct 2023 **Organizer**, conference “Chiaccherate nonlineari”, Alghero, Italy. <https://sites.google.com/view/chiaccheratenonlineari2023/home-page>
- Sep 2015 **Co-organizer**, conference CAMo: from Molecules to Modeling, Torino, Italy.

Workshops

- Apr 2023 **Organizer**, PRIN 2022 workshop “Time-varying signals on graphs: real and complex methods – TIGRECO”, Bergamo, Italy. <https://sites.google.com/view/tigreco/workshop-2024>
- Nov 2016 **Co-organizer**, 1st International Workshop Franco-Italian Mathematical Ecology Days, Torino, Italy.

Minisymposia, sessions and special streams

- Jul 2026 **Session organizer:** “Modeling of Neural Dynamics and Neurodegeneration”, ECMTB 2026, Graz, Austria, 13–17 July 2026. <https://ecmtb2026.org>
- Jun 2026 **Special stream organizer:** “Theoretical and Computational Methods for Graphs”, with A. De Rossi, NUMTA 2026, 21–27 June 2026, Calabria, Italy. <https://www.numta.org/special-streams-and-sessions/>
- Sep 2025 **Minisymposium organizer:** “Approximation Methods and Mathematical Models”, with R. Cavoretto, Società Italiana di Matematica Applicata e Industriale, SIMAI 2025, Trieste, Italy. <https://simai2025.cimne.com/event/areas?tipo=MS>
- Sep 2024 **Minisymposium organizer:** “Mathematical Imaging and Signal Processing”, with W. Erb, Dolomites Workshop on Constructive Approximation and Applications (DWCAA 2024), Alba di Canazei, Italy. <https://sites.google.com/view/dwcaa24/home-page>

Awards and grants

Awards

- Jun 2021 Team first prize, as PI, Proposal Gamification Day, workshop Think Tank on Scientific Computing and Funding Opportunities, Camerino, Italy, 18–19 June 2021.
- Jun 2016 Best Student Presentation Award, BIOMATH 2016 and the School for Young Scientists, Blagoevgrad, Bulgaria.

Grants

- 2020 SNSF Travel Grant 2020, CHF 200.
- 2019 SMB Landahl-Busenbergr Travel Grant 2019, USD 500.
- Jul 2018 SMB Landahl Travel Grant 2018, USD 750.
- Jun 2018 Financial support to participate in the 2018 Joint CAMBAM/NSERC-CREATE in Complex Dynamics Summer School, Montreal, Canada.
- Jun 2016 SMB Financial Aid Grant, BIOMATH 2016.
- Jan 2016 Financial support to participate in the V Southern-Summer School on Mathematical Biology and the School on Physics Applications in Biology, São Paulo, Brazil.
- Jul–Sep 2016 Erasmus Plus Traineeship grant, University of Osnabrück, Germany.
- 2014–2017 Three-year Ph.D. scholarship sponsored by the University of Torino.
- 2008–2013 Scholarship sponsored by EDISU.

Third mission

- 2023 **Article in SIAM News Blog.** Title: “Model Represents Metastatic Tumor Growth to Explore Treatments”. <https://www.siam.org/publications/siam-news/articles/model-represents-metastatic-tumor-growth-to-explore-treatments>
- 2020 **Article in MaddMaths! Matematica Divulgazione Didattica.** Title: “I modelli matematici, strumenti potenti ai tempi della pandemia Covid-19”. <https://maddmaths.simai.eu/divulgazione/i-modelli-matematici-strumenti-potenti-ai-tempi-della-pandemia-covid-19/>
- 2020 **Article in European Women in Mathematics (EWM) Newsletter 34.** Title: “Modelling, a powerful tool in the time of the COVID-19 pandemic”. <https://www.europeanwomeninmaths.org/bulai-modelling/>

- 2019 **Press article in La Repubblica, Naples.** https://napoli.repubblica.it/cronaca/2019/08/01/news/potenza_all_universita_venti_nuovi_ricercatori-232542615/
- 2019 **Interview, TGR Basilicata.** https://www.youtube.com/watch?v=MNfgtk_uvAY
- 2014 **Interview, “Matematica – TRACKS Notte dei Ricercatori”.** <https://www.youtube.com/watch?v=P6SvvXyGPTU>
- 2014 **Researchers’ Night** in Torino, a European-level science outreach event.

Research profile

My first research experience dates back to my Master’s studies at the University of Torino, where a team project led to a publication in *Nonlinear Dynamics*. During the early years of my Ph.D., I worked on different topics in analysis and applied mathematics before focusing my doctoral research on mathematical biology. Since then, I have developed a broad and interdisciplinary research profile spanning mathematical biology, dynamical systems, numerical analysis, graph signal processing, and applied modelling. My scientific output currently includes more than thirty peer-reviewed papers in international journals, three book chapters, and eight conference proceedings, with more than 250 citations in Scopus. Over the years, I have actively presented my work at numerous international conferences, including many invited talks, and I have received several travel grants as well as the Best Student Presentation Award at BIOMATH 2016. I have also contributed to the organization of several international scientific events.

From the beginning of my academic career, I have shown a strong commitment to international mobility and interdisciplinary collaboration. During my Ph.D., I spent two months at the NuHAG group of Prof. Hans G. Feichtinger, an experience that broadened my mathematical background. In January 2016, I participated in two international schools in São Paulo, Brazil, where I worked in an interdisciplinary team and later co-authored a paper published in the *Journal of Biological Systems*. I also spent two months at the University of Osnabrück through the Erasmus programme, where I established long-term scientific connections. In the following years, I further expanded my international network through research visits to several institutions, including a six-month stay at EPFL and the University of Geneva in Prof. Dimitri Van De Ville’s lab, and a visiting period at the University of Tennessee with Prof. Suzanne Lenhart. These experiences strengthened my conviction that interdisciplinary research is essential for addressing complex scientific problems and shaped my long-term goal of leading an interdisciplinary research group.

In my Ph.D. thesis, under the supervision of Prof. Ezio Venturino, I investigated several original problems in mathematical biology. The first part of the thesis focused on biological wastewater bioremediation using fungi, where I formulated and analysed new models for the biodegradation of pollutants in water bodies. The second part addressed ecological problems involving interacting populations, including an application to a fungal disease affecting olive trees. My contribution concerned both model formulation and the mathematical analysis of equilibria, stability properties, and bifurcation structures. I also contributed substantially to the development of models for interacting populations with herd behaviour. This work led to several publications and laid the foundations for subsequent collaborations in mathematical ecology and biomathematics.

During my postdoctoral research at the University of Padova, in Prof. Morten Gram Pedersen's group, I moved into a new research area concerning the mathematical modelling of subcellular and cellular mechanisms involved in hormone secretion. I quickly acquired the necessary biological and mathematical background and applied dynamical systems techniques to the analysis of existing models. This work led to the development of a modified and biophysically realistic model of pancreatic beta cells, producing behaviour much closer to experimental observations; the results were published in *Nonlinear Dynamics*. I also worked on the mathematical explanation of mixed-mode bursting oscillations through canard theory, as well as on bioengineering problems related to the differences between bursting and spiking in terms of calcium dynamics. This period was crucial for broadening my expertise and for consolidating several international collaborations.

As Assistant Professor at the University of Basilicata, I further expanded my research activity in both applied mathematics and numerical analysis. In particular, I started two important collaborations. The first, with the numerical analysis group, focused on the reformulation of a metastatic tumor growth PDE model as a second-kind Volterra integral equation and on its numerical solution. The second, with Sandra Saliani, led to the introduction of spectral graph wavelet packets on graphs for a single data point, extending to graphs ideas analogous to the classical wavelet packet transform. These projects marked a significant step in the diversification of my research interests toward numerical methods, approximation, and graph-based methods.

At the University of Sassari, where I served first as tenure-track Assistant Professor and then briefly as Associate Professor, I consolidated my scientific independence by developing my own research agenda, attracting funding as principal investigator, and building a growing network of collaborators and junior researchers. In this period, I worked on mathematical modelling in the life sciences, control problems, approximation methods, and graph signal processing, while continuing collaborations with colleagues from previous institutions.

Since March 2025, I have been Associate Professor in Numerical Analysis at the Department of Mathematics "Giuseppe Peano" of the University of Torino. In this role, I have continued to strengthen my independent research profile while expanding my activity in numerical analysis, approximation methods, graph signal processing, and mathematical modelling. Returning to Torino has also allowed me to establish new local collaborations, supervise students, and further develop an integrated research programme bridging theoretical, computational, and applied mathematics. Overall, my academic path reflects a strong commitment to scientific collaboration, intellectual independence, and interdisciplinary research.
